Verbal Description:

This modelled censer fragment is made of a jícaro type paste with lots of micaceous inclusions. The color of the paste is indecipherable as the sherd is burned to black front and back. The shape of the sherd is also ambiguous. It has a ridge with six slight vertical incisions coming off the sherd. The incisions separate the strips into dots almost. The bottom of the sherd flares out slightly oriented diagonally from the ridge. There is no paint or slip visible.
